

LICHENS AND MOSSES ON TREES

Do
You
Know
Why?

Some Of Nature's Most Fascinating Organisms
are found in our forests and even in our own back yards.

- Can you tell the difference between lichen, moss or algae?
- What is their importance in our environment?
- How do they benefit our eco-system?

Find out more about these ecological wonders at a free
informational learning session at

Driftwood Nature Center at Tenkiller State Park

This field study course is designed to educate participants on
the different characteristics, terminology and structures of these
vital components of our forests ecosystems.

Sheila Strawn, Ph.D., ecologist and science educator, will share
her valuable knowledge and guidance with participants during
the 3-hour session.

Saturday, April 14, 2018 9:00am-12:00pm

This one-of-a-kind course is free for all participants.

Registration is requested for class size.

Driftwood Nature Center Discovery Activities
are also offered from 1:00-3:00pm.
